6t	Researcher Name		Academic College	Academic Department	Research Description	Main Sustainability Type	F
Count 1	Elbert, Chanda	TAMU	Academic Conege Agriculture And Life Sciences	Academic Department Ag Leadership, Education & Communication	Desertor description Do Elbert is an elucational research professor who specializes in leadership, communication, and the expansion of DEI in the agricultural sector. Her recent works seek to develop a framework for enhanced education of individuals in the agricultural sector in order to become more effective and productive leaders.	Environmental & Social & Economic	Sources https://scholars.ilbrary.tamu.edu/vivo/display/n22b54c50/Persony/View%20A <u>ll</u>
2	Wald, Dara *	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Wald is a professor who specializes in communication between the agicultural and environmental sectors, and her research focuses on ways to overcome and eliminate the social and educational barriers between the two fields.	Environmental & Social	https://scholars.library.tamu.edu/vivo/display/n6d3d32b2/Persons/View%20All
3	Odom, Summer	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Odom is a professor who teaches agricultural leadership and communications. Her research is related to college student leadership development, and engagement in service activities at the university, state, and national levels. Her most recent research covers the integration of diversity and intentionality into leadership on a national level.	Social	https://scholars.ilinary.tamu.edu/viva/display/s06sffcead/Persona/View620All
4	Wingenbach, Gary	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Wingenback is a research based professor who works with the Borlaug Institute for Agricuture. His recent works includes research on communications and perceptions around agricultural trade on a global scale and the science based marketing of nutritional info for organic foods.	Social	https://scholars.library.tamu.edu/vivo/display/n13558929/Persons/View%20All
5	Strong, Robert	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Strong is a research professor who specializes in the intersections between mental health, agricultural communications and media, and the advancement of technology in agricultura ite investigates involution adproximation in agricultural sciences and extension contexts including electronic Renasible Learning Diplets (RIOs), information communication Technologies (ICT), previous agricultura, and virtual reality. He evaluates stakeholder adoption and impact resulting from aparticipation in riting programs.	Environmental & Social & Economic	<u>https://scholars.ilbrary.tamu.edu/wo/display/n51eded80/Persony/New%20All</u>
6	Briers, Gary	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Briers is a research and teaching professor who specializes in agricultural leadership and development projects. His recent research has encapsulated the demographics of pig farmers in the U.S., the productivity of women-ied farms in foreign countries, and the qualities of character and skill required for leaders in student affris.	Environmental & Social & Economic	https://scholars.library.tamu.edu/vivo/display/n18826869/Persons/View%20All
7	Moore, Lori	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	subern attains. Dr. Moore is a professor who specializes in research that seeks to provide the best standards and procedures for quality leaders and educators in higher education and student affairs, with a heavy focus on education within the agricultural sector.	Social	https://scholars.library.tamu.edu/vivo/display/nf53479a0/Persons/View%20All
8	Murphrey, Theresa	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Murphrey is a research based professor who specializes in communication and evaluation of impact.Her research focuses on the teaching and learning process, the change process, and the study of evaluation. Scholarly engagement reolves around dissemination of new knowledge in these areas, often as a result of grant- funded projects.	Social	https://scholars.ibrary.tamu.edu/vivo/6kg/av/r5d76005a/Persons/View%20All
9	Dooley, Kim *	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Dooley is a professor who specializes in research around interdisciplinary agricultural leadenship and communication. Her research is focused on teaching and learning in both formal and non formal settings. This includes topics related to experiential and service learning in international settings, the use of technology for teaching and learning, community regagement and resiliency, and impact for teaching and learning, community congegement and resiliency, and impact models.	Social	bitgo://scholars.library.tamu.edu/viyo/fisplay/n1262b373/Persons/View/520All
10	Leggette, Holli *	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	evaluation. Dr. Leggette is a professor who specializes in scientific communication through various forms of media. Her research focuses on examining the communication needs of scientific communicators to meet the needs of their global audiences through delivering targetes clientific information.	Environmental & Social	https://scholars.ilbrary.tamu.edu/vivo/display/nc17334b0/hersony/Viewfs20All
11	Preston, Tammie *	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Preston is a teaching professor who specializes inThe interconnectedness between socially constructed, identities, leadership, motivation, and self-concept on learning and teaching in the classroom.	Social	https://scholars.library.tamu.edu/vivo/display/n9a6d05d8/Persons/View%20All
12	Byce, Carmen	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Byce is a teaching professor who works primarily with horticultural and agricultural innovation and education. Dr. Byce's work is intended to help reach the SDG of zero hunger.	Environmental, Social, & Economic	https://scholars.library.tamu.edu/vivo/display/n6613bb81/Persons/View%20All
13	Harlin, Julie	TAMU	Agriculture And Life Sciences	Ag Leadership, Education & Communication	Dr. Harlin is a teaching professor who specializes in collaborations between science educators within the Agricultural sector, as well as practitioners within the AgriLife Extension Service. Revisit, she has not published since 2013.	Environmental & Social	https://scholars.library.tamu.edu/vivo/display/n99909a82/Persons/View%20All
14	Klose, Steven	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Klose is coordinator of the FARM Assistance program, of The Texas A&M AgriUIE textrsion Service. The Financial And Risk Management Assistance programs is diseigned to provide strategic decision information to unique and dirense Texas agricultural operations. Dr. Klose is also a member of the Agricultural and Rob Okiloy Center and works with this group in the areas of applied policy research and farm level simulation modeling.	Environmental & Social	https://scholars.library.tamu.edu/vio/display/n5045e455/Person/MewR20All
15		TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Zapata's research agenda focuses on economic feasibility analysis, economic impact of new invasive pests and diseases, production optimization, valuation of novel technologies and product attributes, organic agriculture, price analysis, and risk management.	Environmental & Social & Economic	https://scholars.library.tamu.edu/vivo/display/n2eafd0ff/Persons/View%20All
16	Bryant, Henry	TAMU	Agriculture And Life Sciences	Agricultural Economics	risk management.	Environmental & Social & Economic	https://scholars.library.tamu.edu/vivo/display/nf0d52389/Persons/View%20All
17	Robinson, John	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Robinson's prior experience includes research and extension within the Texas A&M University System (College Station, Trial), Verono, Weslaco) and at Mississips Taste University. His current extension program emphasizes risk management issues related to cotton, including cath markets, hedging, contracting, insurance, policy, and transportation/logistics.	Economic	<u>https://scholars.illerary.tamu.edu/vivo/display/nsi3ccc644/Persons/View/ISOAII</u>
18	Anderson, David	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. David Anderson is a Professor and Estension Economist in the Department of Apricultural Economics A Texas ABA University. His estension education and research activities are in livestock, and food products marketing and agricultural policy. He is the Tession University and Economics Department Marketing economist. Dr. Anderson's program has focused research on livestock markets and the impact of alternative term programs on the livestock, dairy and crop sectors of agriculture. Recent extension programs have focused on livestock market could/ba and fam programs.	Economic	https://wholensillenary.tamu.edu/size/display/nd811473c/Persons/Vene/32001
19	Palma, Marco	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Marco A Palma is Professor in the Department of Agricultural Economics at Texas A&M University. His areas of interest are consumer economics, food choices, experimental and behavioral economics and neuroeconomics.	Economic	https://scholars.library.tamu.edu/vivo/display/nba337537/Persons/View%20All
20	Woodward, Richard	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Woodward is an economic who gescalites in the interactions between consumption and natural resources. Dr. Woodward's research is in the general and of environmental and resource economics. Recent research projects have focused on the use of transle permits to address water quality and fisheries problems and problems of choice under uncertainty.	Environmental	https://scholars.library.tamu.adu/vivo/8isplay/n115a5981/Persons/View/%20All
21	Dharmasena, Kalu A. Senarath	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Dharmasena is an agribusiness specialist and instructional professor. His research pertains to consumer preference for plant based products, the average U.S. consumer's food intake, and the influence of agriculture on rural land values within the U.S.	Environmental & Social & Economic	https://scholar.google.com/citations?view_op=list_works&ht=en&ht=en&user=Uzc3o8UAAA Al&sontby=pubdate
22	Melo Guerrero, Grace	TAMU	Agriculture And Life Sciences	Agricultural Economics	Grate Media is an Accountability Climate, Equity, and Scholarship (ACES) Fourly Fellow in the Department of Agricultural Economics. She is interested in policy- oriented research questions involving individual choices and perferences. In the past, the has studied Hopanic perferences for immigration policy attributes and students' perferences for learning assessments in Latin. America. Her current research focuses on food security and diet quality of households from underrepresented groups in the US.	Environmental & Social & Economic	https://wholars.library.tamu.edu/who/display/n78441890/Person/View/K20AI
23	Zhang, Yvette Yu	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Zhang's research interests include Behavioral Economics, Applied Econometrics, Experimental Economics, Food Safety and Policy, Environmental Economics, Nutrition and Health, Development Economics, International	Social & Economic	https://scholars.library.tamu.edu/vivo/display/nbada46b6/Persons/View%20All
24	Capps, Oral	TAMU	Agriculture And Life Sciences	Agricultural Economics	Economics, and Neuroeconomics. Or: Capps is a demand and price analyst, with particular expertise in econometric modeling and forecasting methods. Applied research areas include analyses of expenditure patterns of per-opseure floods and floods acter away from home, analyses of health and nutrition issues, and uses of scanner-derived information for managerial decision-making. In addition, he specializes in unitateral price effects of mergers and acquisitions as well as evaluations of agricultural checkoff aroranametrial decision-making. In additional price and the second scanner decision of agricultural checkoff aroranametrial decision.	Environmental & Social & Economic	<u>https://scholars.library.tamu.edu/wo/display/na2417d91/Person/Viewh20AII</u>
25	Shcherbakova, Anastasia	TAMU	Agriculture And Life Sciences	Agricultural Economics	programs. In her research, Professor Shcherbakova addresses challenges posed by climate change, and existing energy policies by evaluating the effects of current and potential policies, and identifying at which stages of the policial, regulatory, or enforcement process the benefits and effectiveness of the policy may become	Environmental & Social	https://scholars.library.tamu.edu/vivo/display/n#721e4d8/Persons/View%20All
26	Ishdorj, Ariun	TAMU	Agriculture And Life Sciences	Agricultural Economics	enoncement process are beneficial and electiveness or the pointy may decome hindered or diffued. Dr. Ishdorj's areas of research include demand analysis, food consumption and issues related to well-being and nutrition-related health outcomes of individuals participating in food assistance programs.	Environmental & Social & Economic	https://scholars.library.tamu.edu/vivo/display/n8e77cf9c/PersonsAview%20All
27	Lopez Barrera, Emiliano	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Barren's current research focuses on understanding how future patterns of global food consumption will affect human health, and how the agricultural changes needed to support the ongoing global nutrition transition will affect the environment. He combines econometric tools with economic and nutrition	Environmental & Social	http://sholar.google.com/citation??ht=m&user=0_ 3WHZYAAAA&wiew.op=list.works&sorthy=pubdate
					modeling to explore the trade-offs and linkages among diets, human health, and environmental sustainability.		

28	McCarl, Bruce	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. McCarl's recent research efforts have largely involved policy analysis (mainly in	Environmental & Social & Economic	https://scholars.library.tamu.edu/vivo/display/n9596bd48/Persons/View%20All
			•	•	climate change, climate change mitigation, water economics, and biosecurity) as well as the proper application of quantitative methods to such analyses.		
29	Mjelde, James	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Mjede's research has primarily focused on the design of information forecasting systems. His secondary emphasis has been incorporating dynamics into decision making models. His most recent research has specifically applied these models into investigations about sustainable development.	Environmental & Economic	https://scholars.library.tamu.edu/vivo/display/n29a897f0/Persons/View%20All
30	Salin, Victoria	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Salin's research relates to food safety, traceability, and efficiency of enterprises involved in food distribution. Salin provides economic and financial research for the Scientific Advisory Council of the World Food Logistics Organization, an affiliate of the Global Cold Chain Alliance.	Environmental & Social & Economic	https://scholars.library.tamu.edu/vivo/display/nd23715b4/Persons/View%20All
31	Boadu, Frederick	TAMU	Agriculture And Life Sciences	Agricultural Economics	Organization, an annue of the endoar could chain rainarde. Dr. Boadu's research focuses on applying tools in law and economics to address issues in international trade law and economics, economic development, resource economics, international environment policy, and constitutional economics.	Environmental & Social & Economic	https://scholars.library.tamu.edu/vivo/display/nae58dbdf/Persons/View%20All
32	Vedenov, Dmitry	TAMU	Agriculture And Life Sciences	Agricultural Economics	Dr. Vedenov's is a research-based professor who's interests are in agribusiness, finance, decision-making under uncertainty, risk management, crop insurance and	Economic	https://scholars.library.tamu.edu/vivo/display/n816d692b/Persons/View%20All
33	Gehring, Kerri	TAMU	Agriculture And Life Sciences	Animal Science	dynamic models in economics. Dr. Kerri B. Gehring is a professor in the meat science section of the Department of Animal Science and nexident and CEO of the International HACCP Alliance	Environmental & Social	https://animalscience.tamu.edu/people/gehring-kerri/
					Gening is also a meat science faculty member at Texas A&M University. She team- teaches a NACCP course for graduate/undergraduate students and eccordinates various NACCP and food safety industry training programs. Gening has worked closely with the food industry to provide valuable assistance in implementing NACCP programs. The recent research has deait with hose technologies that		
					detect diseases in meats with greater efficiency in order to provide people with healthy foods.		
34	Wickersham, Tryon	TAMU	Agriculture And Life Sciences	Animal Science	Dr. Tryon Wickersham is an associate professor in the animal nutrition section of the Department of Animal Science. He directs research in murana nutrition with an interest in forage utilization and nitrogen metabolism. Future research goals include determining optimum augiementation strategies for ruminants comsuming forages of divergent nutritive values and furthering our understanding of nitrogen metabolism in ruminants.	Environmental & Social	https://scholars.ibrany.tamu.edu/inoidisplay/n31.633.647/Persons/Adewt52004
35	Gill, Jason	TAMU	Agriculture And Life Sciences	Animal Science	Dr. Gill's major research focus is the biology and application of the viruses of bacteria, called bacteriophages or simply phages. Research in Dr. Gill's lab encompasses phage genomics, basic phage biology and the applications of phages benchmark there are a simple phage biology and the applications of phages benchmark there are a simple phage biology and the applications of phages benchmark there are a simple phage biology and the applications of phages biology and biology and biology and biology and biology and biology and biology biology and biology and biology and and and and and and and and	Environmental & Social	https://scholars.library.tamu.edu/wwo/display/n6277ae7f/Persons/View%20All
36	Taylor, Matthew	TAMU	Agriculture And Life Sciences	Animal Science	In real-world setting, Or. Taylor's primary research interests are in the utilization and mechanisms of fool antimicrobials to inhibit bacterial footborne pathogens. Specifically, research is conducted to investigate and determine the manner by which food antimicrobials inhibit microbial pathogens. Additionally, research is conducted that week to overcome obstacles to the use of food antimicrobials in some product by the encapsulation of food antimicrobials.	Environmental & Social	https://wimalscience.tamu.edu/people/tay/or-matthew/
37	Tedeschi, Luis	TAMU	Agriculture And Life Sciences	Animal Science	Dr. Tedeschi conducts research on energy and nutrient requirements of grazing and feedlot animals, growth biology and bioenergetics, chemical composition and kinetics of fermentation of feeds. modeling and simulation of decision support	Environmental	https://scholars.library.tamu.edu/vivo/display/n387904d6/Persons/View%20All

42	Porter, Dana	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	human consumption. Research allows finds the origin of cultivation for said potato varieties.	Environmental	https://scholars.library.tamu.edu/www/display/nf4c9588c/Persons/View%20All
					water conservation and efficient water use through maximizing limps ct of applied reach or pagma and information researce. Digeticities of the programs are to 1) promote appropriate application of technologies, irrigation management tools and practices. ² Information equilibrium of use of parcillutors ² Information by improving understanding of irrigation technologies, BMPs and related crop water management concepts, and 3) provide relevant educational relatuces and opportunities for traditional and emerging audiences.		
43	Jaber, Fouad	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	Dr. Jaber is a research specialist who works with integrated water resources management with specific concentration on watershed management programs; evaluation of stream processes and hydraulics to foster implementation of stream	Environmental	https://scholars.library.tamu.edu/vivo/display/n9c70cce1/Persons/View%20All
44	Hardin, Robert	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	restoration programming. Dr. Hardin's research involves developing intelligent machine systems for agricultural production and processing. To meet the demands of the agricultural sector, his work has focused on integrating product, low cost sensing systems with statistical and physical models for automation and process control. He has conducted research on optimizing cotton processing, with a particular focus on increasing energy efficiency. He has also studied how plant genetics, environmental and masagement factors, and processing factoralize introlary interact affect energy use and product quality. Dr. Hardin has also conducted research in precision agriculture and measuring efficiency of novel agricultural machinery spitems.	Environmental & Economic	https://xholars.library.tamu.edu/woj6tsplay/n0034085/Persons/Veex/S20AII
45	Capareda, Sergio	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	Dr. Capareda's research explores how by products of crop production can be utilized as cattle feed in order to eliminate waste and increase agricultural efficiency.	Environmental & Economic	https://scholars.library.tamu.edu/vivo/display/n5974e0e3/Persons/View%20All
46	Singh, Vijay	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	Single Jas water engineering speciality with research interests in Surface-water Mordrogs, Groundwater Herdrögen, Hurdinacis, Errigitoni Gargenering, Environmental Quality and Water Recurses, Principal research topics have encompassed. 2. Watershed moteling, J. Erosion and Sedemin Transport in Upland Watersheds, 3. Streamflow Forecasting, 4. Dam Break Analysis, S. Entrop- Based Modeling, 6. Herwich Deign, 7. Convolnateet Modeling, and 8. Hydrologic impacted global anone emissions.	Environmental	https://scholars.ille.org.temu.edu/ino(display/infd83e14/Persons/Year%204I
47	Calabrese, Salvatore	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	D. Calabrase runs a lab with multiple nearesh interest, and this work items at quantifying the interaction between the hypotogic cycles and the physical and approximate and processes in the sol and throughout the Co titical Zones with an absolution of the dimplex characteristic physical processing the understeading of the complex dynamics of the water and nutrient cycles, ho seeks, understeading of the complex dynamics of the water and nutrient cycles, ho seeks and and plant carbon storage, and prevent our ecosystems from degrading.	Environmental	https://cholars.ilkrary.tamu.edu/wojdisplay/n9705a8000/Penions/Weav%20A8
48	Moreira, Rosana	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	Dr. Moreira's research interests include engineering aspects of foods and food processes, fundamental modeling: dehydration, friving, extrusion, food intradiation; process control tochingues va applied to food processing systems: food extrusion processes, continuous fryers, and continuous flow grains dyers; deep-fat friving: modeling, oil absorbin mechanisms, vacuum friving, acrymatike, impingement drying; food safety: food irradiation and biosensor technology.	Environmental	https://scholars.library.tamu.edu/vivo/display/n51d8a153/Pernony/View%20AL
49	Lacey, Ronald	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	Dr. Lacey's research includes the monitoring of bioaerosols in the atmoshpere and how they affect air pollution levels and the publich health.	Environmental & Social	https://scholars.library.tamu.edu/vivo/display/n40609d06/Persons/View%20All
50	Moore, Janie	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	Dr. Moore is a research and teaching professor who's goal is to identify post- haivest iteratment technologies capable of transforming light into value added demicials. This research also provides new knowledge on the rel of acore and atmospheric cold plasma treatments for the relaction of spoilage organisms during post-harvest processing and storage. Research is currently being conducted with a variety of commodities including, stored grains (i.e., corn, rice), oil seeks and byprodust (j.g., contonseid, cutomised meal), and packaged produce (i.e., tomatoes and romaine lettuce).	Environmental & Economic	https://scholars.ilbrary.tamu.edu/vivo/display/n717488ea/Pernom/View/h20All
51			Agriculture And Life Sciences	Biological And Agricultural Engineering	Dr. Nikolov's Bioseparations Lab conducts transformative research in bioprocess engineering aimed at the development of novel and cost-effective strategies for extraction and purification of recombinant and native bioineducies. Bioseparations Lab bievrages scientific and engineering expertise of Lab members to find solutions for a variety of bioprocessing and separations challenges that currently face plant and algab biotechnology.	Environmental & Economic	https://scholars.library.tamu.edu/woj6tsplay/n19485315/Persons/Yew/S20All
52	Mohtar, Rabi	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	Dr. Mohtar is a researching professor who specializes in writing on water management policy, water management analysis, and water in the context of the climate emergency.	Environmental	https://scholars.library.tamu.edu/vivo/display/nfb7c25ed/Persons/View%20All
53	King, Maria	TAMU	Agriculture And Life Sciences	Biological And Agricultural Engineering	Dr. King is a research professor who's research interests flocus on the development of the wetted wait gedona exercical clickor technology to monitor potential health hazards and improve surveillance efforts by collecting aerosols released from agricultural and industrial facilities and modeling particle dispersion.	Environmental & Social	https://scholars.library.tamu.edu/vivo/display/n44870816/Persons/View%20All

					· · · · · · · · · · · · · · · · · · ·		
74	Light, Jessica	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Light is interested in evolution, systematics, and population genetics of vertebrates and invertebrates. In particular, her interests are in investigating cospeciation between mammals and their parasites to determine which factors	Environmental	https://scholars.library.tamu.edu/vivo/display/nef845312/Persons/View%20All
					are important in driving the associations between distantly related taxa. Research in the Light lab is focused broadly in evolutionary biology with a focus on		
					systematics, population genetics, and coevolutionary associations between distantly related organisms, particularly mammals and their parasites		
75	Fujiwara, Masami	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Fujiwara is a teaching and research professor who's main interest is in	Environmental	https://scholars.library.tamu.edu/vivo/display/ne81c8383/Persons/View%20All
					quantitative population ecology, with a particular emphasis on understanding the dynamics of fish and wildlife populations. His studies focus on individual and population level processes because he believes a deeper knowledge of these		
					processes will lead to a deeper understanding of how the environment affects ecological processes.		
76	Grant, William	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Grant conducts research through the Ecological Systems Laboratory and teaches undergraduate and graduate courses relating to ecology, conservation	Environmental & Economic	https://scholars.library.tamu.edu/vivo/display/n6d094941/Persons/View%20All
					and ecological modeling. The Ecological Systems Laboratory promotes formal exposure to systems analysis and simulation as an integral part of the training of professionals and academicians involved in ecological research or natural resource		
					management. Systems analysis refers both to a general problem-solving philosophy and to a collection of quantitative techniques, including simulation,		
					developed specifically to address problems related to the functioning of complex systems.		
77	Kreuter, Urs	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Kreuter directs a research program focusing on the Human Dimensions of Rangeland Ecosystem Management. His research is driven by his multidisciplinary	Environmental & Social & Economic	https://scholars.library.tamu.edu/vivo/display/nd413cbcd/Persons/View%20All
					interests in ecological economics, rural sociology and environmental psychology and aims to develop theory regarding integrated ecosystem management.		
					Research projects that he directs are conducted at individual property, community and ecosystem scales. Some issues that Dr. Kreuter's research program have addressed include the effects of shifting social values and human demographics on		
					rangeland management; the effectiveness of incentive programs aimed at improving rangeland health, wildlife habitat and water quality on private lands;		
					the effects of landowner perceptions regarding property rights on ecosystem management; and factors influencing the use of fire as a rangeland management		
					tool. Dr Kreuter's research aims to inform policy aimed at creating positive incentives for the sustainable use and management of terrestrial ecosystems under a broad range of land tenure systems.		
78	Loopstra, Carol	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Carol Loopstra is an associate professor in the Department of Ecology and Conservation Biology with teaching and research interests in the biological aspects	Environmental & Economic	https://scholars.library.tamu.edu/vivo/display/n7a948193/Persons/View%20All
					of Forestry. She teaches "Forest Trees of North America" and "Tree Improvement and Regeneration". Her research has evolved over time from molecular biology of forest trees forcising on word development and frought resistance to consider		
					genomics focusing on drought resistance. Her latest project is funded by the USDA and is a collaboration with the Western Gulf Forest Tree Improvement Program.		
					This project is an attempt to take earlier work and use WGFTIP progeny tests to develop molecular markers and biomarkers that can be used to assist with selection of and breeding for trees with increased water-use- efficiency and		
					drought resistance while at the same time increasing photosynthetic efficiency and growth.		
79	Lawing, Michelle	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Lawing is an Associate Professor in the Department of Ecology and	Environmental	https://scholars.library.tamu.edu/vivo/display/n4d1c74b5/Persons/View%20All
					Conservation Biology. She is primarily interested in using methods and models from modern ecology and evolutionary biology combined with evidence from the fossil record to inform our understanding of how species and communities		
					respond to environmental change through time. Her work includes the investigation of geographic, evolutionary, and morphological responses of species		
					and communities to environmental changes in the Late Pleistocene and throughout the Miocene to present.		
80	Veldman, Joseph	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	In the Veldman Lab at Texas A&M University, we study relationships among plant species, ecosystem functions, and human-induced environmental change. Fire -	Environmental	https://scholars.library.tamu.edu/vivo/display/nbc6131af/Persons/View%20AII
					both as an ancient ecological force and as a management tool - is central to our research on the conservation and restoration of tropical and subtropical savannas		
					and forests. Through interdisciplinary collaborations and outreach to environmental organizations, we work to improve public policies that impact fire- dependent ecosystems and human livelihoods.		
81	Boutton, Thomas	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Boutton is interested in the ecology of grassland and savanna ecosystems,	Environmental & Social & Economic	https://scholars.library.tamu.edu/vivo/display/n50abe2cc/Persons/View%20All
					particularly the impacts of land cover/land use changes on ecosystem processes (productivity, decomposition, biogeochemistry, hydrology). At present, most of his work is oriented towards understanding the influence of woody plant invasion		
					into grasslands and savanas on biogeochemistry and soil biology. He is also interested in understanding ecosystem responses to global changes predicted for		
					the future. The effects of climate, land use, and atmospheric composition on ecosystem structure and function are being investigated at time scales ranging		
					from a few years (contemporary ecosystems) to thousands of years (paleo ecosystems), and spatial scales ranging from the soil aggregate to the landscape.		
82	Dewitt, Thomas	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Dewitt is an associate professor who is primarily interested in ecology, and has recently explored Evolutionary ecology, Morphometrics and biometry, Trait and	Environmental	https://scholars.library.tamu.edu/vivo/display/nb4aed80b/Persons/View%20All
					marker genetics, Predation ecology, Theoretical modeling, and Aquatic animals.		
83	Winemiller, Leslie	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Kelso-Winemiller's early research focused on translational regulation in sea urchin early development and more recently, she has conducted research on fish ecology in Africa and South America.	Environmental	https://scholars.library.tamu.edu/vivo/display/ndfcdb36f/Persons/View%20All
84	Voelker, Gary	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Voelker is an ornithologist/evolutionary biologist, and his lab focuses primarily on developing molecular phylogenies of avian lineages (and now a few mammals),	Environmental & Social	https://scholars.library.tamu.edu/vivo/display/nc63d7bcc/Persons/View%20All
					and using these phylogenies to address questions posed by relationships within those lineages. To date, this research has focused on genera that are distributed on two or more continents (Anthus (bipits). Motacilla (watatils). Cinclus (diopers)		
					and Turdus (thrushes)). In addition to resolving species relationships and revising taxonomy, work in the lab has dealt with reconstructing historical biogeography		
					and examining the relative roles that dispersal and vicariance (e.g., mountain uplift) may have played in the development of modern day species distributions and assemblages.		
85	Casola, Claudio	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Casola and his research team at The Casola Lab are interested in studying	Environmental	https://scholars.library.tamu.edu/vivo/display/n94d8cb9d/Persons/View%20All
					genome evolution and adaptation in plants using both experimental and computational approaches. They are currently investigating in three main areas:		
					Evolution of lineage-specific traits and adaptation through gene turnover. Population variation in drought tolerance in loblolly pine		
					Molecular basis of convergent evolution		
86	Popescu, Sorin	TAMU	Agriculture And Life Sciences	Ecology And Conservation Biology	Dr. Sorin Popescu's academic interests focus on the application of remote sensing, in particular, and spatial sciences, in general, in natural resources assessment,	Environmental & Economic	https://scholars.library.tamu.edu/vivo/display/nbdf8b134/Persons/View%20All
					monitoring, and management. His research interests include remote sensing applications in natural resources and forest sciences, assessment of forest fuels,		
					forest volume and biomass, land use and land cover change, forest carbon sources and sinks, and global environmental change. He has developed various algorithms		
					forest volume and biomass, land use and land cover change, forest carbon sources

					Enhanced oil recovery: thermodynamics and transport phenomena applied to chemical, miscible, and thermal recovery processes Analytical and numerical modeling of CO2 storage and capture		
					Multiphase flow, flow assurance and leak detection methods		
426	Behie, Stewart	TAMU	Engineering	Chemical Engineering	Dr. Behie is a safety protocol specialist. He has more than 40 years of technical experience in process safety, including more than 10 years at facilities in the	Environmental & Social	https://scholars.library.tamu.edu/vivo/display/n53931224/Persons/View%20All
					Middle East. Behie has published several articles on risk-based decision management and risk management in operational settings and has given workshops on creating excellence in safety performance.		
427	Knappett, Peter	TAMU	Geosciences	Geology And Geophysics	Dr. Knappet is interested in predicting the impacts of intensive groundwater	Environmental	https://scholars.library.tamu.edu/www./display/n21dc06e7/Persons/View%520All
					pumping on regional groundwater quality. This includes regions with problems with naturally occurring, toxic concentrations of arsenic and fluoride, and regions		
					with anthropogenic contamination at the surface. He is also interested in how dynamic interactions between rivers and aquifers change the supply and biochemical composition of both.		
428	Newman, Julie	TAMU	Geosciences	Geology And Geophysics	Dr. Newman investigates rheology, deformation processes, and deformation	Environmental	https://scholars.library.tamu.edu/vivo/display/n86cd191c/Persons/View%20All
					conditions (e.g., pressure, temperature, stress, strain-rate) in crustal and upper mantle environments through field, microstructural and geochemical studies.		
	Bhatia, Mukul	TAMU	Geosciences	Geology And Geophysics	Dr. Bhatia is an associate professor with an interest in water, drilling, water wells, sustainable development of water drilling technology.	Environmental	https://scholars.library.tamu.edu/vivo/display/nb2b7a092/Persons/View%20All
430	Zhan, Hongbin	TAMU	Geosciences	Geology And Geophysics	Dr. Zhan's teaching and research interests are primarily in fundamental processes of groundwater hydrology, flow and transport in geological formations, and their	Environmental	https://scholars.library.tamu.edu/vivo/display/n31c29796/Persons/View%20All
					applications in water resources management and geological, environmental, and petroleum engineering. He is also recently interested in unconventional		
					subsurface flow and transport processes, with the studied media changing from permeable porous and fractured ones to much less permeable ones such as clay and shale, and the studied pore sizes also changing from millimeters to micro-		
					meters or even nano-meters. He is interested in the following research:		
					1. Flow and solute transport in highly deformable low-permeability porous media		
					2. Interaction of aquifer with connected and disconnected rivers		
					3. Vapor flow and transport in the subsurface		
					A. Non-Darcian flow and its impact on anomalous transport S. Coupled unsaturated-saturated flow and transport problems		
					6. Radial dispersion and push-and-pull tests		
					7. Flow and transport in sloping aquifers		
					8. Coupled aquifer-conduit-fracture flow and transport		
					9. Flow and transport in fracture-matrix systems		
	Kitajima, Hiroko	TAMU	Geosciences	Geology And Geophysics	aeoloav. hvdroaeoloav. numerical modelina. and scientific drillina.	Environmental	https://scholars.library.tamu.edu/vivo/display/n69a78f25/Persons/View%20All
432	Giardino, John	TAMU	Geosciences	Geology And Geophysics	Dr. Giardino is a research professor with interests in: Alpine geomorphology, fluvial geomorphology, critical zone studies, engineering geology	Environmental	https://scholars.library.tamu.edu/vivo/display/n38ad171c/Persons/View%20All
433	Pope, Michael	TAMU	Geosciences	Geology And Geophysics	Dr. Pope's research interests focus on three main topics: 1) Integrating litho-, chemo- and chronostratigraphy in a regional sequence stratigraphic framework to	Environmental	https://scholars.library.tamu.edu/vivo/display/n50988f03/Persons/View%20All
					understand high-frequency and long-term climatic and oceanic processes affecting development of sedimentary successions; towards this end I am currently most		
					interested in the transitions that occur between global icehouse and greenhouse conditions and how these affect reservoir characterization. 2) Using detrital zircon servicenology to understand sediment dissersal and large-scale tectonic		
					geocramonology to understand sediment dispersal and large-scale tectonic processes. 3) Determining the structural deformation (twinning, cataclasis, brecciation, etc.) produced in carbonates by meteorite impacts as a means to		
					establish objective criteria for cratering - similar to shocked quartz.		
434	Laya Pereira, Juan Carlos	TAMU	Geosciences	Geology And Geophysics	Dr. Laya Pereira's current research interests are in the broad area of carbonate sedimentology and stratigraphy. The topics he is focusing on include:	Environmental	https://scholars.library.tamu.edu/vivo/display/n70ce65bb/Persons/View%20All
					1) Carbonate reservoir characterization and modeling from modern and outcrop		
					analogues, (interested in Caribbean islands, also Pacific and Indian Ocean islands)		
					2) Late Paleozoic carbonate petroleum systems and opportunities for exploration 3) Diseanasis and porosity evolution, using image analysis tools as a key for		
					 Diagenesis and porosity evolution, using image analysis tools as a key for petrophysics. 		
					 The use of stable isotope geochemistry including clumped isotopes in understanding deposition, diagenesis and basin evolution. 		
					5) Unconventional Carbonate reservoirs and basin analysis.		
435	Perez, Nicholas	TAMU	Geosciences	Geology And Geophysics	margins, the role of structural inheritance on deformation and subsidence	Environmental	https://scholars.library.tamu.edu/vivo/display/n7033c8ff/Persons/View%20All
					patterns, tectonic influences on sedimentology, stratigraphy, and basin architecture, continent-scale sediment routing, and tectonic-climate interactions.		
436	Belanger, Christina	TAMU	Geosciences	Geology And Geophysics	Dr. Belanger is interested in identifying how organisms respond, why they respond, and to which environmental factors they are primarily responding is	Environmental	https://scholars.library.tamu.edu/vivo/display/n7665a171/Persons/View%20All
					integral to understanding how future climate change will affect the modern biota as well as to inform efforts to sustain biodiversity and economically important

438	Liu, Yina	TAMU	Geosciences	Oceanography	observation and data collection tools. Dr. Liu is an organic biogeochemist with particular interests in how organic compounds', both natural and anthropogenic, cycling affect biological and	Environmental	https://scholars.library.tamu.edu/vivo/display/nfc7a9688/Persons/View%20All
					ecological processes and vice versa. These interconnected processes are important drivers for organic carbon and contaminant cycling at regional and global scales.		
					Her research group uses untargeted and targeted analyses as well as data science to shed light on different aspects of organic biogeochemistry.		
439	Zhang, Shuang	TAMU	Geosciences	Oceanography	Dr. Zhang's research broadly uses data-driven and model-driven approaches to ouantify the patterns of water and element flux involved in the global carbon and	Environmental	https://scholars.library.tamu.edu/vivo/display/n4df0ce51/Persons/View%20All
					particip the particip of water and element not moved in the global carbon and biogeochemical cycles, especially under periods of climatic perturbations.		

440	Zhang, Yige	TAMU	Geosciences	Oceanography	geochemistry, geochemical and climate modeling as tools to study past changes in climate and global biogeochemical cycles, with the goal of learning lessons for our	Environmental	https://scholars.libran, tamu.edu/vivo/display/n613c8c7l/Persons/View%20All
441	Slowey, Niall	TAMU	Geosciences	Oceanography	future. Dr. Slowey's research interests include: Paleoceanography and paleoclimatology. Continential slope and carbonate bank sedimentary processes High-resolution seismic stratigraphy quaterary sea level history.	Environmental	https://scholars.librany.tamu.edu/vivo/display/n2a90b101/Persons/View%20All
442	Sylvan, Jason	TAMU	Geosciences	Oceanography	Acoustic and physical properties of marine sediments Dr. Sylbar's research focuses on two aspects of microbial acology - interactions between the ocean crust and marine microbes, and the impact of anthropogenic influence on marine microbes. He determine the effect microbial communities have on biogeochemical cycles in a variety of settings through quantification of microbial biomasc, analysis of microbial diversity and function, and measurement	Environmental	tttp://scholars.ikrary.tamu.edu/ww/display/n7tb1298a/Person/VeewR20Al
443	Campbell, Lisa	TAMU	Geosciences	Oceanography	of microbial activity, His research is interdisciplinary and involves collaboration with chemistis, geologistis and biological oceanographers. Dr. Campbell's research focuses on phytoplankton population dynamics; harmful algal bioms and mechanisms of bioom formation; transcriptomics and metabolomics of marine dimillageliates; ocean observing systems; and flow	Environmental	https://scholars.library.tamu.edu/vivo/display/c7a7d6659/Persons/View%20All
444	Chapman, Piers	TAMU	Geosciences	Oceanography	ortometry and imaging-in-flow ortometry. Dr. Piers's research interests include: (a) Marine chemistry - nutrient cycling in coastal areas, and their use as tracers as a means of identifying large-scale oceanic circulation patterns; the marine iodine cycle.	Environmental	https://scholars.library.tamu.edu/woi/display/na59307e9/Persony/Wew%20All
					(b) The physics and chemistry of upwelling areas. (c) Low oxygen regimes in the ocean. (d) Marine pollution - oil pollution control methods, particularly dispersant usage.		
445	Yvon-Lewis, Shari	TAMU	Geosciences	Oceanography	Dr. Yon-Lewis's group studies the role of the ocean in regulating atmospherically important trace gases. A variety of trace gases including halocarbons (e.g. methyl haldes, trihlomethene), intruso avide, icarion claudic, and methane are both produced and degraded in the ocean. The distribution and strength of the various course sources and insis impacts the actionage of these gases between the ocean and atmosphere. Through ship-band measurements, laboratory studies and modeling, her research group examines the role inagnitude of oceanic influence on trace gases that are important in the atmosphere as stratospheric ozone depletors or greenhouse gases.	Environmental	https://scholars.illorary.tamu.edu/wojdisplay/n5aa8136c/Personu/Veew520All
446	Knap, Anthony	TAMU	Geosciences	Oceanography	Dr. Knap's primary research focuses include oceanography, organic geochemistry, environmental science, atmosphere/ocean interactions, oil pollution and dispersant use, and effects of contaminants on the marine environment. Global climate change is another area of interest, particularly climate instability, business/science interactions, renewable energy, marine derived bio-fuels, ocean genomics, ocean additiatation.	Environmental	https://scholars.library.tamu.edu/vio/display/n15ee8664/Persong/View%20A8
447	Jones, Spencer	TAMU	Geosciences	Oceanography	Dr. Jonel is Physical Decompting-ther whose research focusses on ocoan dynamics, and explores however horizonts heat and other tracers around the globe, He uses a combination of theory, ocean models and scalable analysis tools in python. Nuch of Joney' work investigates the strength, geometry and variability of the Meridional Diverturing Toculation (jonetices called the "conveyor bett" circulation), which transports heat from the surface of the tropical Pacific into the Alamict basis, where it mores heat on thrward.	Environmental	https://ocean.tamu.edu/people/profiles/faculty/onesspencer.html
448	Shamberger, Kathryn	TAMU	Geosciences	Geeanography	Dr. Shamberger is a chemical oceanographer whose research focuses on the ocean carbon cycle, is alteration by anthropogenic ocean addification, and the impacts of ocean addification on addrifing organism and ecosystems, namely tropical and deep seas coral reefs, and oyster reefs. Her research involves investigating the natural cycling of carbon dioxide in coral reef and costal accostsmet, the sensitivity of these systems to ocean addification and other anthropogenic stresors, and corotics on marine calification. Dr. Shamberger snearch is larger, field based on reefs in the carboen, main Heawaiian Islands, northwest Hwawiia Islands, Emporer Semount Chain, American Samoa, Palau, the Great Barrier Reef, Taiwan, and the Guil of Mexico.	Environmental	https://scholars.ilbrany.tamu.edu/wojdisplay/n75e8b8icd/Penonu/Wew%20AU
449	Dimarco, Steven	TAMU	Geosciences	Oceanography	Dr. Dimarco's lab works on oceanographic observations using real-time technology: autonomous ocean velticles, site-based instrumentation, moored platforms. Coastal, sitel, sispe processes, magnial asea, coastal eutrophication and hypoxia. Apglications include: coastal hard, hypoxia, harmful algab blooms, oil sijil, ocean acidication, aquaculture, cimate change. 					Identifying Normative and Atypical Developmental Trajectories of Emotion Development		
					Gene-environment Interplay in the Development of Risk for Anxiety Problems		
516	Burte, Heather	TAMU	Liberal Arts	Psychology	Dr. Burte researches the connection between individual differences in spatial thinking and learning in STEM fields, and then uses those connections to develop	Environmental & Social	https://scholars.library.tamu.edu/vivo/display/n49033478/Persons/View%20All
					assessments and interventions. Since spatial thinking is found in a wide variety of domains, the lab focuses on spatial skills and strategies in three areas: (1) first-		
					year college students learning physics, (2) elementary students learning math, and (3) sense-of-direction in navigation.		
517	Gaylord Harden, Noni	TAMU	Liberal Arts	Psychology	Dr. Gaylord's primary research interest has been in the investigation of stress, coping, and psychosocial functioning in African American adolescents. She	Social	https://scholars.library.tamu.edu/vivo/display/n47fe5fa9/Persons/View%20All
					examines the effects of stressors in multiple contexts on depression and anxiety in urban, ethnic minority youth. Her research has also examined the role of		
					modifiable protective factors, such as coping strategies and parent-child relationships, among youth in high-risk contexts. Her recent work focuses on		
					exposure to community violence as a stressor for youth in urban communities. She is interested in examining the variability in community violence exposure,		
					understanding the longitudinal impact of violence exposure on subsequent adolescent functioning, identifying coping strategies that may be both adaptive		
					for community violence exposure, and understanding the process of desensitization to community violence and how it may be linked to subsequent emotional and behavioral functioning.		
					emotional and benavioral functioning.		
518	Mathur, Vani	TAMU	Liberal Arts	Psychology	Dr. Mathur's work focuses on understanding the sources of disparities in pain, and the specific mechanisms by which social and cultural factors alter pain experience	Social	https://scholars.library.tamu.edu/vivo/display/n40fc0470/Persons/View%20All
					and pain physiology. Her research targets the problem of pain disparities from two directions - investigating the different ways social factors may influence one's		
					own pain, and also alter pain perception and empathy for others. To tackle these problems, her lab utilizes behavioral, psychophysical, and neuroimaging		
					methodologies. She is also interested in individual differences in chronic pain and pain modulation, cross-cultural examinations of pain and empathy, and social environmental effects on health broadly defined.		
					environmental effects on health broadly defined.		
519	Alexander, Gerianne	TAMU	Liberal Arts	Psychology	Dr. Alexander's research focuses on the development of human sex differences in social and cognitive behavior; Hormonal influences on typical and atypical	Social	https://scholars.library.tamu.edu/vivo/display/nedf89e33/Persons/View%20All
					behavior across the lifespan; Reproductive endocrinology and behavior.		
520	Vaid, Jyotsna	TAMU	Liberal Arts	Psychology	Dr. Vaid's research focuses on bi/multilingualism: cognitive, neurocognitive and social aspects; creative cognition: processing of jokes, proverbs, and idioms; and diversity science: language diversity; gender and race and equity in higher	Social	https://scholars.library.tamu.edu/vivo/display/n7b74aa66/Persons/View%20All
521	Schlegel, Rebecca	TAMU	Liberal Arts	Psychology	education. Dr. Schergel's research aims to understand how people answer the "big" questions	Social	https://scholars.library.tamu.edu/v/vo/display/n827ed6eb/Persons/View%20All
					in life and how people's answers to those questions influence their attitudes and behavior. Her lab formulates and tests a wide range of hypotheses related to		
					many types of existential concerns focusing on the antecedents and consequences of the experience of meaning in life, authenticity, self-alienation, perceptions of		
522	Meagher, Mary	TAMU	Liberal Arts	Psychology	free-will, and mortality awareness. Dr. Meagher is an associate professor with research interests in:	Social	https://scholars.library.tamu.edu/vivo/display/n8fa87422/Persons/View%20All
	,				Biobehavioral mechanisms that influence pain Stress and Disease		
					Psychoneuroimmunology Health Psychology		
523	Arthur, Winfred	TAMU	Liberal Arts	Psychology	with an emphasis on testing, assessment, selection, validation, and associated	Environmental & Social	https://scholars.library.tamu.edu/vivo/display/n5516b1d0/Persons/View%20All
					methodological issues including but not limited to meta-analysis; (2) individual and team training with a focus on complex skill acquisition and factors related to minimizing skill decay and enhancing retention. This line of research also focuses		
					on training design features and their relationship to the effectiveness of organizational training; and (3) the identification and examination of individual		
					difference variables related to complex information processing tasks such as driving behaviors and vehicle crash involvement.

590	Ozerov, Oleg	TAMU	Science	Chemistry	small scales. Dr. Ozerov's research involves transition metal or main group organometallic chemistry but are diverse and cover a wide variety of synthetic and mechanistic work. The ideal-case research scheme consists of: 1) discovery of a new reaction or a structural environment; 2) demonstration of nursual reactivity, structural, or	Environmental	https://scholars.ilbrary.tamu.edu/Wooldisplay/n88/768d/Persons/Vew%20A8
					electronic novelty; 3) application of these findings to develop a new catalytic process.		
591	Schweikert, Emile	TAMU	Science	Chemistry	Dr. Schweinterts research involves the externme limits of analytical chemistry: the distracterization of atto to apetondre quantities of molecules. The gain is to detect such amounts of analyte within nanometric surface volumes. The gain is chemical imaging of surfaces with equivality spatial resolutions. The first volumes is to conceive methods and instrumentation for the accurate identification of as little as a few thousand molecules. The second challenge is to convert a measurement into analytical information.	Environmental	https://scholars.iltnav.tamu.edu/vio/dsplay/n2330627/Persons/View/2004
592	Bluemel, Janet	TAMU	Science	Chemistry	Dr. Bluemet's research regards surface-immobilized homogeneous catalysts are easy to recycle, and can be highly active and selective. Furthermore they are amenable to systematic design. Bhe finds the most interesting results when heterobimetallic systems, such as the Sonogashar Pd/Cu catalyst for the coupling of any haldes and terminal alwayes, are involved.	Environmental	https://scholars.ilbrary.tamu.edu/vioid/splay/ne3b7e44f/Persons/Veurh20At
593	Sheldon, Matthew		Science	Chemistry	and plasmonic materials provide a route to achieve the maximum possible conversion efficiency with solid state and plotoelectrochemical systems. They explore how nanostructuring materials enables systematic control of the thermodynamic prameters govering positical power conversion, enabling optimization that can shape, cooline, and interconvert the energy and entropy of a radiation field. Additionally, the remarkate nanoscale tailorability of a variety of structural properties, such as electrochemical potential, can further enable novel photochemical systems with broad application beyond the scope solar energy conversion.
